Third International “En Face” OCT and OCT Angiography Congress

The First and Second “En Face” OCT and OCT Angiography Congress held in Rome December 2013 and 2014, were successful: intense two days meetings with more than 700 attendees each. “En Face” Imaging and OCT Angiography appear to have huge development possibilities. These Congresses proved that:

- OCT Angiography times have arrived and fulfill a huge research and clinical need.
- “En Face” OCT imaging is now a widely accepted technology.
- “En Face” OCT imaging and OCT Angiography attract the best and the brightest ophthalmologists, scientists, engineers, retina specialists and clinicians.
- Industry is aware of our scientific and clinical needs and is actively pursuing the development of innovative OCT imaging and OCT Angiography strategies.

Due to interest in these topics we organize the **Third International “En Face” OCT and OCT Angiography Congress, December 11-12, 2015 in Rome.**

Best regards,

Bruno Lumbroso, Gabriel Coscas, K. Bailey Freund, James Fujimoto, David Huang, Philip Rosenfeld and Richard Spaide
